INSTALLATION INSTRUCTIONS FOR SHEDS-MULTIMEDIA VERSION 3
July 13, 2007

Uninstall Previous Versions

It is recommended that you uninstall any earlier copies of SHEDS Multimedia. Previous versions of Multimedia can be uninstalled using the Add/Remove Programs tool on your system Control Panel.

Installing SHEDS Multimedia

Insert the CD and use Windows Explorer to display the files on it. Double click on the executable setup file, named SHEDS_Multimedia_Setup_3.14c.exe. Follow the installation instructions displayed. The defaults should suffice for most users. OPP users should see the note below. Once installed, click on the desktop icon created for SHEDS-Multimedia. This should launch SAS with the SHEDS-Multimedia main window. Follow the SHEDS User Manual to run the model.

Another way to launch SHEDS is to select in Windows:

Start->All Programs->SHEDS Multimedia->SHEDS Multimedia 3.0

To uninstall SHEDS:

Start->All Programs->SHEDS Multimedia->Uninstall SHEDS Multimedia 3.0

Note for OPP users: You will need to install the program in your My Documents folder. When the installation screen asks where you want to install, click on the Browse button and navigate to
        C:\Documents and Settings\<user name>\My Documents\
and then click on the OK button. Continue accepting defaults after this.
